WELCOME TO Luma

Luma is a statewide modernization effort that will combine Budget, Finance, Procurement, Human Resources, and Payroll functionality into one Enterprise Resource System (ERP). This modernization effort will transform the way the State of Idaho does business, improve transparency, and provide a core foundation for the future.

Receive and Inspect Goods or Services: What's Changing?

Impacts

Who:

- Receivers
- Inventory Managers
- Logistics Supervisors

What:

- IPRO and will be replaced by Luma.
- Any other agency 3rd party systems or spreadsheets used to track inventory will also be replaced.

When:

The Procurement module will go live on July 1, 2021.

What differences can I expect?

Locations
Agencies can designate locations where goods or services will be accepted in Luma and then track all items in their inventory using sub-inventory locations.

Item Management
Luma users will have greater visibility of item locations which helps to improve purchasing models and strategic sources of goods and services. Long term, this can contribute to the reduction of costs.

Quality Assurance
Receivers will have the ability to inspect items for quality before accepting them into inventory. This will allow for quality assurance in all items received, reducing the hassle of returning inadequate items when they are discovered later.

Receipt Holds
Receivers will be able to put a receipt on hold in Luma until an inspection of a good is completed, preventing duplicate or early payments. This new functionality will provide clear communications and tracking for receivers.

Lot Numbers
Logistic Supervisors will have the ability to verify items are the correct and expected items when received using lot numbers.

Item Returns
Buyers will have the ability to process items in Luma to show that they are being returned and see comments regarding the return.
